MODULE 1

INTRODUCTION

INTRODUCTION

The origin of auditing can be traced to Italy. Around the year 1494, Luca Paciolo introduced the double entry system of bookkeeping and described the duties and responsibilities of an Auditor.

Preparation of accounts is not the duty of an Auditor. “Auditing begins, where accountancy ends”. Auditor is only concerned for checking and verification of records. Auditor is a qualified person appointed for the purpose of certification of work done by others.

Techniques of Auditing

Following are the common techniques of auditing's:

- ✓ Checking of posting and casting.
- ✓ Physical verification of assets.
- ✓ Verification and examination of transactions with available evidences.
- ✓ Scrutiny of the books of accounts,
- ✓ Checking of various calculations.
- ✓ Checking of carried forward balances in next year.
- ✓ Checking of Bank reconciliation statements.
- ✓ Auditor can get information from inside and outside sources of organization.

ANBARASU AND JALAPATHI CHARATERED ACCOUNTANT

In Anbarasu & Jalapathi was founded by CA. S. Anbarasu and CA. K. Jalapathi and we began our humble journey in the year 2004. CA. KAVITHA

CA. KAVITHA, a partner of the firm, qualified in 2004. She is presently leading the teams specializing in Tax audits, Internal and Risk Management Audits alongside other partners.

❖ TEAM & STAFF'S

The company's success truly stems from recruiting the best talent; our firm is equipped with an ideal proportion of staffs. The partners of the firm have adequate experience in conducting internal audits and various types of audits for large corporates.

We have a multi-disciplinary team of over 50+ personnel from diversified backgrounds, which comprises of Chartered Accountants, Information Systems Auditors (DISA), Management Graduates amongst others, and this enable our firm to deliver multiple range of services with expertise in tackling complex problems.

The team consists of, in addition to partners, 3 semi-qualified assistants, 29 Article Assistants (3 incl semi-qualifies), 17 audit assistants (graduates and post graduates) and an ex-banker.

We have classified each department vertically and each team had achieved specialization in their respective departments. Team heads continuously update and communicate to get the work done in most efficient manner.

MODULE 3
AUDITOR AND AUDITEE RELATIONSHIP

AUDITOR AND AUDITEE RELATIONSHIP

- ✓ The auditor is the competent person performing the audit.
- ✓ Auditee The organization and people being audited are collectively called the auditee.
- ✓ Client The client is the person or organization with the authority to request the audit.
- ✓ Auditee should view Auditor as a business partner while the Auditor should develop better understanding of the business and operational issues.
- ✓ This will facilitate audit methodology that is based on mutual understanding of audit and business needs.
- ✓ Internal Auditor should engage with Auditee on a periodic basis from the very beginning till the end of the audit process to discuss audit objectives, audit plan, audit findings and audit conclusions.
- ✓ The discussion should go beyond the audit process to discuss potential solutions to the business issues observed from a operational perspective as well as their impact on risk and compliance.
- ✓ The objective should be to create validation with the management with a bottom-up approach to avoid any surprises or contradictions in the final audit report.
- ✓ Auditee should consider Internal Auditors as partial process owners and not as outsiders who monitor business activities for finding faults and point failures.
- ✓ Auditee should engage with Internal Auditors with an understanding that their primary goal is to identify key issues that may have material impact and recommend possible solutions.
- ✓ Sometimes, it can also serve as a way to get attention from senior management on critical challenges that require budget or resource allocation or possibly a change for better business performance that the Auditee wants to drive but is not able to garner management support and priority.
- ✓ Auditee should view Auditor as a business partner while the Auditor should develop better understanding of the business and operational issues.
- ✓ This will facilitate audit methodology that is based on mutual understanding of audit and business needs.
- ✓ Auditor The auditor is the competent person performing the audit.
- ✓ Auditee The organization and people being audited are collectively called the auditee.

- ✓ Auditee should consider Internal Auditors as partial process owners and not as outsiders who monitor business activities for finding faults and point failures.
- ✓ Auditee should engage with Internal Auditors with an understanding that their primary goal is to identify key issues that may have material impact and recommend possible solutions.
- ✓ Sometimes, it can also serve as a way to get attention from senior management on critical challenges that require budget or resource allocation or possibly a change for better business performance that the Auditee wants to drive but is not able to garner management support and priority.

MODULE 4
AUDIT PLAN AND PROCEDURE

PLAN AND PROCEDURE

Basis “The auditor should plan his work to enable him to conduct an effective audit in an efficient and timely manner. Plans should be based on knowledge of the client's business. Plans should be made to cover, among other things:

- (a) Acquiring knowledge of the client's accounting systems, policies and internal control procedures;
- (b) Establishing the expected degree of reliance to be placed on internal control;
- (c) Determining and programming the nature, timing, and extent of the audit procedures to be performed; and
- (d) Coordinating the work to be performed. Plans should be further developed and revised as necessary during the course of the audit.”

Adequate audit planning of audit

- ✓ Ensure that appropriate attention is devoted to important areas of the audit;
- ✓ Ensure that potential problems are promptly identified;
- ✓ Ensure that the work is completed expeditiously;
- ✓ Utilize the assistants properly; and
- ✓ Co-ordinate the work done by other auditors and experts.

Inspection

Inspection involves examining records or documents, whether internal or external, in paper form, electronic form or other media or a physical examination of an asset. Inspection of records and documents provides audit evidence of varying degrees of reliability. Inspection of tangible assets may provide reliable audit evidence with respect to their existence, but not necessarily about the entity's rights and obligations or the valuation of the assets in such case inspection by vouching can be done to get a 26 Financial Accounting and Auditing clear idea.

Observation

Observation consists of looking at a process or procedure being performed by others, for example, the auditor's observation of inventory counting by the entity's employees. Observation provides evidence about the performance of a process or procedure, but is limited to point in time at which the observation takes place, and by the fact that the act of being observed may affect how the process or procedure is performed.

Inquiry

Inquiry consists of seeking information of organization either from within the entity or outside the entity. Inquiry is used throughout the audit in addition to other audit procedures. Inquiries may range from formal written inquiries to informal oral inquiries.

Analytical Procedures

Analytical procedures consist of evaluations of financial information made by a study ratio or comparisons between the firms or comparisons between the two years.

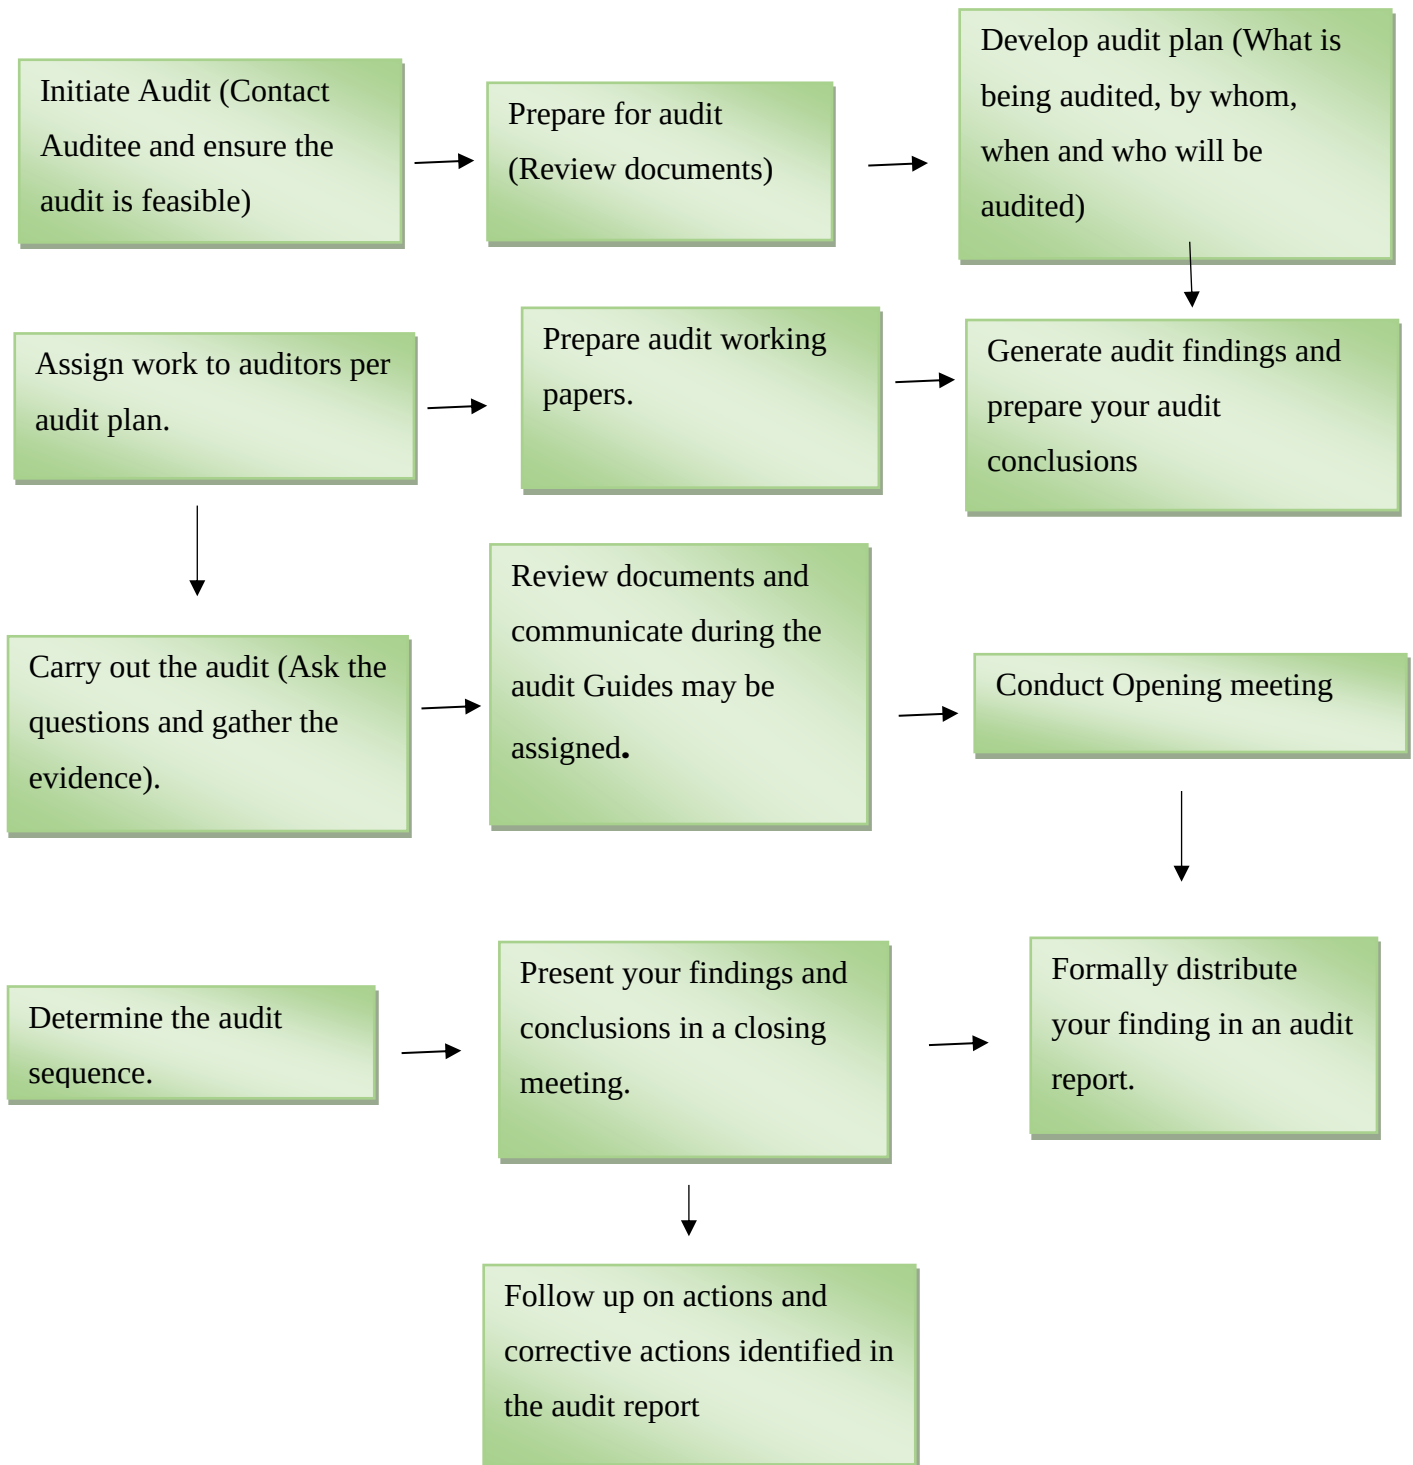

External Conformation

An external conformation represents audit evidence obtained by the auditor as a direct written response to the auditor from a third party for example auditor will take confirmation from the debtors directly for the balance.

MODULE 6

SOFTWARE USED IN AUDITING

SOFTWARE USED

Software is designed primarily to be used by IT auditors. Also, this user-friendly and easy-to-configure auditing software helps businesses conduct audits to ensure compliance with internal protocols and policies.

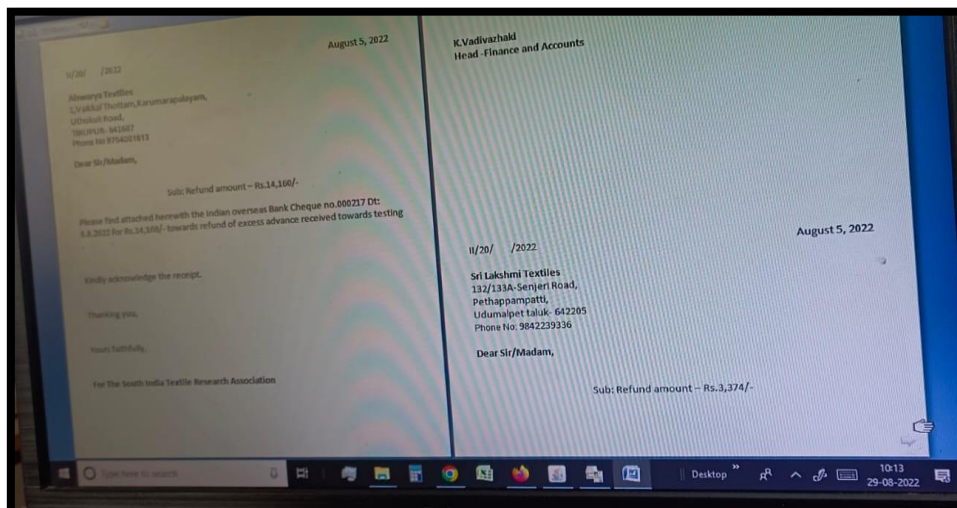

- ✓ Microsoft Office
- ✓ Sitilive
- ✓ Chequeman

MICROSOFT OFFICE

1. MICROSOFT WORD:

In Microsoft word, it is used to type the refund letters to the customer. Microsoft Word was initially launched in 1983, and has since been revised numerous times. It is available for both Windows and Apple operating systems.

2. MICROSOFT EXCEL

In Microsoft excel I used to adjust:

- ✓ pending receivables,
- ✓ tripur IDBI Bank
- ✓ Journal voucher.

Microsoft Excel enables users to format, organize and calculate data in a spreadsheet. By organizing data using software like Excel, data analysts and other users can make information easier to view as data is added or changed. Excel contains a large number of boxes called cells that are ordered in rows and columns.

3. SITILIVE

In ANBARASU AND JALAPATHI COMPANY they are using the app called **SITILIVE**, which is used for checking and creating all documents.

A screenshot of a Microsoft Excel spreadsheet titled 'TINUPUR STATEMENT JULY-2022 1 - Microsoft Excel'. The spreadsheet displays a detailed financial statement with columns for various categories and amounts. The data is organized into rows, with some cells highlighted in green. The bottom of the spreadsheet shows a summary of sales and a total amount of 14,386.00.

Sl. No.	Particulars	Amount	Sl. No.	Particulars	Amount
1	SALES	14,386.00	2	SALES	14,386.00

99	SALES	14,386.00	100	SALES	14,386.00

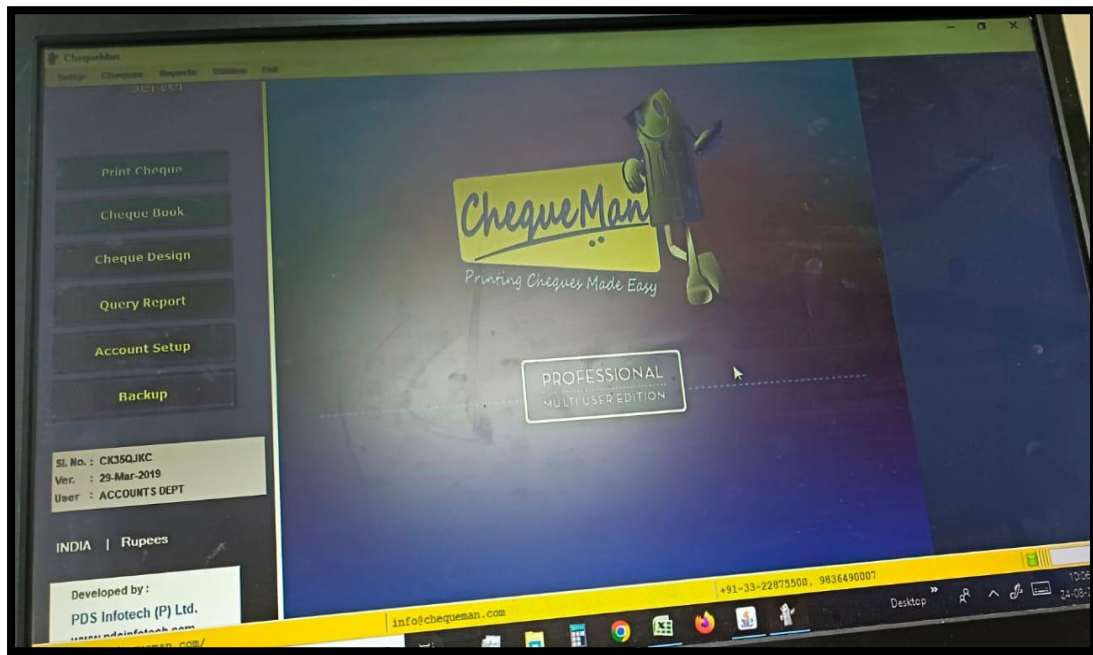

Started learning with SITILIVE app of username, passwords and codes so on...:

- BANK RECEIPTS is used in the code of CDM1030.
- PENDING RECEIVABLES is used in the code of CDM1020.
- BANK PAYMENT is used in the code of CDM1030.
- LEDGER process is used in the code of GLM2043.
- JOURNAL BOOK is used in the code of GLM3920.
- SUPPLIER BILLENTY is used in the code of APM1010.
- BANK RECONCILLATION STATEMENT is used in the code of CDM1070.

These were the code they thought me during **industrial exposure training**.

4. CHEQUEMAN

It is used to issue professionally computer printed cheques. This software is accurate, error-free and most importantly is efficient.

MODULE 7

TAX PROCEDURES

TAX PROCEDURES

Rules Governing Tax Audit

The following is the procedure for filing tax audit report:

- ✓ The Chartered Accountant assigned for conducting tax audit of an individual or an organisation has to present the tax audit report online, using his/her official login credentials. The taxpayer also has to mention the relevant information about their Chartered Accountant in their login platform.
- ✓ Once the tax audit report is uploaded by the auditor, it has to be either accepted or rejected by the taxpayer on their login portal. If the taxpayer rejects the tax audit report, the entire process has to be repeated until the tax audit report is accepted by him/her.
- ✓ Tax audit report has to be filed on or before the pre-determined due date of filing income return, i.e., 30th November of the subsequent assessment year for taxpayers who have engaged in an international transaction and 30th September of the subsequent assessment year for other taxpayers. Rules Governing Tax Audit.
- ✓ The following points are to be noted with regards to Tax Audit:
- ✓ If you are involved in more than 1 business, you will be liable to audit your accounts if the total turnover of all your businesses is more than Rs. 1 crore.
- ✓ If you operate more than 1 profession, you have to audit your account books in case the gross receipts of all the professions cumulatively cross Rs. 50 lakhs.

Forms Required for Tax Audit

- ✓ Tax Audit reports can be presented in two different ways by tax auditors, differing on the basis of the laws under which the accounts have been audited.
- ✓ Form 3CB and Form 3CD: For tax audit reports presented under Section 44AB of the Income Tax Act, 1961, Form 3CB and the prescribed details have to be reported in the Form 3CD.
- ✓ Form 3CA and Form 3CD: When a taxpayer prefers to get the accounts audited under any law other than Section 44AB, then the relevant form is Form 3CA, while the prescribed details have to be reported in the Form 3CD.

Types of Taxes

Taxation in India is majorly divided into Central and State Govt taxes with two types of taxes:

1. Direct Taxes
2. Indirect Taxes

While direct taxes are levied on your earnings in India, indirect taxes are levied on expenses. The responsibility to deposit the direct tax liability lies with the earning party, whether individual, HUF or a company.

Indirect taxes are collected majorly by the corporates and businesses providing services and products. Thus, the responsibility to deposit indirect taxes lies with these entities.

DIRECT TAX

A direct tax is a tax that a person or organization pays directly to the entity that imposed it. Examples include income tax, real property tax, personal property tax, and taxes on assets, all of which are paid by an individual taxpayer directly to the government.

- ✓ A direct tax is paid by an individual or organization to the entity that levied the tax.
- ✓ Direct taxes include income taxes, property taxes, and taxes on assets.
- ✓ There are also indirect taxes, such as sales taxes, wherein a tax is levied on the seller but paid by the buyer.

INCOME TAX

An income tax is a tax imposed on individuals or entities in respect of the income or profits earned by them. Income tax generally is computed as the product of a tax rate times the taxable income. Taxation rates may vary by type or characteristics of the taxpayer and the type of income

They followed Income tax in Anbarasu and Jalapathi company.

MODULE 11

CONCLUSION

CONCLUSION

- ✓ A project report, 'functions performed in a chartered accountancy firm' is the brief study of the functions performed by a Chartered accountant and other functions performed in his firm by other employees. business and recording the STILIVE software become the base of further working.
- ✓ All the returns to be filed need some information to be filed and in some returns the file from tally can be exported to file the return. So, accounting should be done well in time so that it can be verified and no error occurs at the time of filing of return.
- ✓ Gathering of information not only includes the transactions performed but also the complete information about the debtors and creditors of the client's business.
- ✓ So, in order to eliminate the errors information should be gathered well in time and accounting be done accordingly.
- ✓ Another problem that arises is to the clients. This internship has helped me gain practical knowledge in the field of finance.
- ✓ By seeing the books of different organizations, I came to know how the transactions are recorded in the books by different types of organizations.
- ✓ This experience gained through working in the industry will help gain confidence and improve the skills of how to interact with the boss.
